

Festo Learning Experience

The Digital Learning Portal by Festo Didactic

FESTO

Customized Learning Experiences

Sharing expertise and knowledge with students is most educators' main objective. However, preparing comprehensive learning scenarios involves diligent lesson planning and intensive course material creation.

To help educators build industry aligned pedagogical content easier and quicker, we created Festo Learning Experience – the online portal for learners and teachers to access and create customized learning experiences.

This unique online environment is based on an open community approach and features didactically curated learning resources for many technical fields as well as all necessary tools to create engaging lessons while making the most out of your Festo Didactic hardware learning solutions.

Benefits for Teachers

- Receive ready to use, modular learning content for various fields of technical education
- Customize courses and easily create new ones based on learning nuggets
- Provide a motivating learning experience to your students through modern learning methods
- Support your learners individually in heterogeneous learning groups and monitor students' success

Benefits for Learners

- Experience individual learning content which directly relates to your equipment and with tasks you will face in your future job
- Enjoy learning with interactive and multimedia content corresponding to various learning types
- Learn in small course units and progress even in short learning periods
- Learn flexibly on your mobile devices
- Easily get help from your teachers and friends

Festo Learning Experience

The Digital Learning Portal by Festo Didactic

Benefits for Industry Clients

- Have your workforce available on site more often through online learning
- Quick learning success through multimedia learning support
- Employees work remotely on their qualification topics wherever and whenever it fits in their schedule
- Monitor your employees' learning progress
- Benefit from reliable IT security standards
- Receive customized learning paths specifically created for you
- High-quality standards of Festo Didactic learning resources and Festo industry expertise

Topics Covered

- Electricity and Electronics
- Fluid Power
- Factory Automation

In collaboration with dedicated pilot customers, Festo experts continuously add more content and features to the portal.

Key Features

Individual Learning

Customize your learning content. Regroup existing learning nuggets and create new ones to design tailor-made new learning paths.

Equipment Management

Get the most out of your investment in equipment by receiving suggestions for corresponding learning content.

Connected Learning

Learn and practice in direct connection with our hardware to develop application-oriented competencies.

Mobile Learning

Learn anywhere and from any device with responsive design created for a user-friendly learning experience.

Learning Evaluation

Test your learners' knowledge and skills as they work on their learning paths to check their progress.

Competency Management

Find content by required competencies and map the different competencies that the students need to acquire.

Online Authoring

Create and edit learning paths and share your expertise with the community.

Comment and Rate

Comment on available content and receive feedback from other users for the content you've created.
